small talk

MOTION / One fixed finger. A changing story.

Implementation sketch • 390 × 740 CSS-pixel reference • scale responsively • use the chosen approved artwork

A Lock the geometry

Same anchors for all 7 sets and 4 tones.

A = nail cuticle anchor (195, 479).

Finger stays centred and meets the bottom edge.
24–32 px clear space around the main nail.
Soft 8–12% white halo; no flashing.

B Animate the nail layers — never move the finger

Each frame uses the same viewport, finger, controls and receiving anchor. Silhouettes are technical placeholders.

01 HOLD

0–1.60 s

Signature nail is the hero.
Right preview = Brainwave.

02 ACCENT

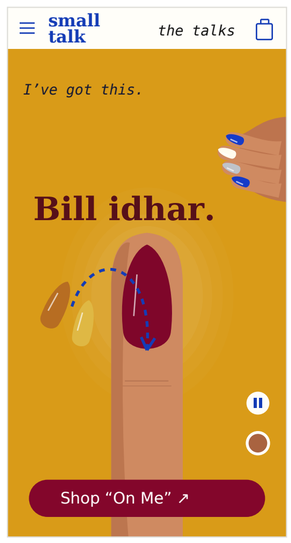

1.60–1.90 s

Left accent → fixed anchor.
Hide donor during flight.

03 RETURN

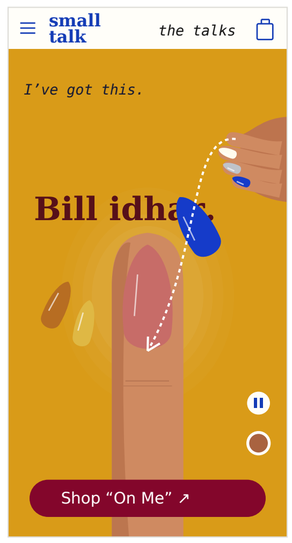

2.35–2.65 s

Signature → same anchor.
Hold before the next set.

04 NEXT SET

3.30–3.90 s

Right nail → same anchor.
Outgoing nail clears.

05 COMMIT

3.90–4.00 s

Brainwave is now active.
Next preview = Diet Cherry.

Registration is shared. Flight paths use actual element bounds, not seven unrelated pixel offsets.

At commit: product + palette + headline + CTA URL + next-preview art change together.
The background blends; the finger does not jump. A missing next asset holds the last good state.

C Playback and timing

ONE PRODUCT / 4.0-second starting schedule

AUTOPLAY

On Me → Brainwave → Diet Cherry → HOLD

Omit the third product’s outgoing flight. Final hold at ~11.3 seconds.

MANUAL NEXT / all seven sets, then wrap

On Me → Brainwave → Diet Cherry → Green Flag →
Shaadi Shift → Wild Card → Pinky Promise → On Me

An ad-matched start follows the same order and three-product limit.

D Interaction and build checks

SCROLL
Always moves the page. Never wait for the animation.

HOLD / RELEASE
Temporary pause; respect all other pause reasons.

TAP NEXT
One next set; manual mode until deliberate resume.

TONE CIRCLE
Four tones; same pose, product and animation state.

PAUSE / RESUME
Explicit control; resume a fresh finite three-set pass.

OFFSCREEN
Stop work; keep state. Do not override user pause.

REDUCED MOTION
Static/manual states; no autoplay or flying nails.

LOAD / UNLOAD
Static first paint; asset fallback; clean up on unload.

Read section 4 of the implementation handoff for the full contract.

DESIGN INTENT ONLY: replace these schematic layers with registered, approved product assets. Written brief governs corrections.
